MATERIAL STORAGE WORKSHEET

Plan your material storage bays

Describe the space and materials so we can discuss the blocks you need.

Project / delivery ZIP

Materials to be stored

Number of bays

Desired clear width per bay

Desired clear depth

Planned material pile height

Loader / equipment used

Ground surface, slope, drainage or other site details

SKETCH YOUR PROPOSED LAYOUT

Mark bay openings, desired inside dimensions and equipment access. Show any existing walls or blocks.

Block quantities, if known / drawings available

Planning the walls: Bay dimensions alone do not determine a safe wall height or block count. For stacked walls or walls holding back material, have the layout, base and loading reviewed by a qualified designer before ordering.
